For the past year and a half, I have been working with the Oriole Park Community Garden Committee, along with the Friends of Oriole Park and City staff, to create Ward 22's first community garden in Oriole Park.

Last week, we had a successful meeting where City staff presented and displayed what the proposed garden may look like and where it will be located within the park. We received positive feedback from residents, and there was dialogue with all parties to make sure the Community Garden is a success.

The next step will be an application and proposal by the Oriole Park Community Garden Committee to the City of Toronto. We continue to welcome your participation and feedback in shaping the Community Garden!
